Education

Bannari Amman Institute of Technology, Erode, Tamil Nadu
Computer Science and Engineering

2023 – 2027
CGPA: 9.04/10

Work Experience

UI/UX Intern | eGaiSoft | Remote

Nov 2023 – Dec 2023

- Designed the **user interface** for the **Elai Fashion tailoring service platform**, covering the **login/sign-up**, **clothing selection**, and **checkout process**.

Software Engineering Intern | eGaiSoft | Remote

Sept 2025 – Oct 2025

- Developed the **frontend interface** for an **automated body measurement platform** for the tailoring industry, managing the workflow for **image uploads**, **user inputs**, and **real-time measurement display**.
- Designed **backend REST APIs** to integrate the **ML-based measurement calculation system** with the frontend.

Skills

- Programming Languages:** Java, SQL, C, Python, JavaScript (ES6+)
- Frontend:** HTML5, CSS, React.js, Tailwind CSS, Redux
- Backend & Database:** Node.js, Express.js, RESTful APIs, MongoDB, Firestore
- Dev Tools:** Git, Github, Postman, MongoDB Atlas, Vercel, Figma
- Core CS:** Data Structures & Algorithms, OS, DBMS, Computer Networks, OOP

Projects

WellCare

github.com/mithra0612/women-app

Tech Stack: MongoDB, Express.js, React.js, Node.js, Gemini Flash 2.0

- Developed a **platform for women's wellness** that provides **blogs and educational articles**, along with **personalized meal plans** based on health conditions and **community forums** for women-to-women connections and sanitary guidance across all age groups, helping to remove the stigma around menstrual discussions.
- Included features such as an **interactive chatbot**, a **gamified myth-busting module**, and **real-time tracking** for **periods, ovulation, and pregnancy** to promote health awareness.

FinVista

github.com/mithra0612/postal-service

Tech Stack: React.js, Node.js, MongoDB, Selenium

- Built an **AI-driven platform** for the **Department of Posts** to analyze **target audiences and optimal promotion timing** for POSB schemes using **demographic data and economic cycles**, with dashboards spanning **state to village levels**.
- Automated **local event discovery and Mela planning** through **web scraping and Google Calendar integration**, and implemented **task tracking, gamification, and a RAG-based AI assistant** to support field execution.

Civic Lens

github.com/mithra0612/civicLens

Tech Stack: React.js, Node.js, MongoDB, Express.js, Charts.js

- Developed a **citizen-centric dashboard** combining **ward-level datasets** to visualize government **project progress, budget allocation**, and post **infrastructure-related grievances** through a **centralized platform**.
- Built an **AI-powered RTI retrieval system** using **RAG** to surface **previously filed RTI responses**, cutting **access time** and improving transparency to citizens.

Achievements

- Smart India Hackathon 2024** – Finalist, Built FinVista
- Hack'IT 25** – Winner, National-Level Hackathon, Anna University CEG, Chennai.
- Nexathon'25** – Best Business Pitch, KCG College of Technology, Chennai.
- .hack();25** – Finalist, Nationwide Hackathon, Mar Athanasius College of Engineering, Kerala.
- TNWISE 2025** – Finalist, Tamil Nadu Centre of Excellence for Advanced Manufacturing.
- Solved 550+ Data Structures and Algorithms problems** across LeetCode, HackerRank, GeeksforGeeks, and Code360.
