Education

Bannari Amman Institute of Technology, Erode, Tamil Nadu
Computer Science and Engineering

2023 – 2027
CGPA: 8.96/10

Experience

Software Engineer Intern | PayPal

Jun 2026 – Aug 2026

- Rebuilt **Virtual Terminal**, a merchant-facing client web application, in **Next.js** using **HTML, CSS, and JavaScript** — developed **responsive UI components**, implemented authentication and payment workflows, and delivered the application to near-production readiness alongside senior developers.
- Performed end-to-end **QA, debugging, and deployment** across the project - debugged cross-browser functional issues using Cypress, wrote Jest unit tests, integrated the CI/CD pipeline.
- Built a **unified 43-widget monitoring dashboard** in Datadog(AWS) consolidating live metrics and automated anomaly detection with **Slack alerting**, reducing manual QA overhead and shipping within a fast-paced, deadline-driven sprint.

Technical Skills

- Languages:** HTML, CSS, JavaScript, Java, Python, SQL
- Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, shadcn/ui
- Databases & Backend:** PostgreSQL, Supabase, Firebase, REST APIs, JWT Authentication
- AI / LLM:** LLM Integration, RAG Pipelines, Prompt Engineering, Hugging Face, Ollama
- Developer Tools:** Git, GitHub, Figma, VS Code, Cypress, Vercel
- CS Fundamentals:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Projects

FinVista | *Tech Stack:* Next.js, MongoDB, Selenium, Recharts, Leaflet, LightGBM, Gemini github.com/mithra0612/postal-service

- Developed an **AI-assisted Decision Support System for India Post** — converted **Figma** wireframes into a client-facing web application using **Next.js, HTML, and CSS**, applying **responsive design** principles to deliver a pixel-close, production-ready UI.
- Built interactive **state-to-village analytics dashboards** and a **LightGBM-based recommendation engine** to identify eligible beneficiaries and match them with suitable POSB schemes.
- Automated regional event discovery using **Selenium web scraping** and integrated a **RAG-based AI assistant** for natural-language access to scheme eligibility, demographic, and region-specific insights.

Veyntra | *Tech Stack:* Next.js, TypeScript, Supabase, LangGraph, Google Gemini, Groq

github.com/mithra0612/Veyntra

- Built an **AI-powered development intent translation platform** that transforms vague software ideas into **implementation-ready development packages** by extracting structured intent and enriching it with professional UI/UX design knowledge.
- Engineered a **multi-stage AI generation workflow** that produces optimized coding prompts, **Product Requirements Documents (PRDs)**, implementation plans, component blueprints, and actionable design quality analysis from a single user idea.
- Developed an **interactive conversational refinement system** that enables developers to iteratively improve generated artifacts while maintaining **synchronized outputs and version history** across successive generations.

Achievements

- National Finalist** - Smart India Hackathon 2024 (AICTE).
- Winner** - Hack'IT 2025, Anna University (CEG), Chennai.
- Solved 500+ DSA problems**, participated in 66 coding contests, and achieved a peak **LeetCode Contest Rating of 1,514**.
- Best Business Pitch Award** - Nexathon 2025, KCG College of Technology, Chennai.
- Competed in 10+** national-level hackathons, coding competitions, and innovation challenges.

Certifications

- NPTEL** – Programming in Java (IIT Kharagpur) **Elite | 98% Score**
- MongoDB** – Building RAG Applications Using MongoDB *(View Credential)*
