

Madhumithra M

Software Engineering Intern

mithramadhu005@gmail.com | +91 8778976022 | linkedin.com/in/mithra0612/ | github.com/mithra0612 | mithra-portfolio.vercel.app

Education

Bannari Amman Institute of Technology, Erode, Tamil Nadu
Computer Science and Engineering

2023 – 2027
CGPA: 8.96/10

Experience

Software Engineer Intern | PayPal

Jun 2026 – Aug 2026

- Migrated **Virtual Terminal**, a merchant-facing payment application, from **Express + React to Next.js App Router**, restructuring routing, middleware, API routes, state management, and core payment workflows while maintaining legacy behavior.
- Worked through a **126-commit, 3,891-file migration**, identifying legacy changes and code drift and establishing Git-based checkpoints to preserve relevant changes across the migration.
- Diagnosed and fixed migration issues across **payment validation, authentication, pricing, currency conversion, and error handling**, restoring functional parity between the legacy and migrated applications.
- Validated migrated functionality through **112/112 passing unit tests** and **70+ passing integration tests** using **Jest and Cypress** against QA services and CI environments.
- Built a **43-widget Datadog observability dashboard** with anomaly monitors and Slack alerts, and independently developed a **Claude Skill integrated with Confluence** to phase migrations, persist migration state, and reuse migration knowledge across sessions.

Technical Skills

- **Languages:** JavaScript, Java, Python, SQL
- **Frameworks:** Next.js, React.js, Node.js, Express.js, Tailwind CSS, shadcn/ui
- **Testing:** Jest, Cypress
- **Backend & Databases:** REST APIs, PostgreSQL, MongoDB, Supabase, Firebase, JWT Authentication
- **AI / Data:** RAG Pipelines, LLM Integration, Prompt Engineering, Claude Skills, Hugging Face, Ollama
- **Tools:** Git, GitHub, Datadog, Confluence, Vercel, Figma

Projects

FinVista

github.com/mithra0612/postal-service

Tech Stack: Next.js, MongoDB, Selenium, Recharts, Leaflet, LightGBM, Gemini

- Developed an **AI-assisted decision support system for India Post** using **Next.js**, with state-to-village dashboards for demographic and POSB scheme analytics.
- Built a **LightGBM recommendation engine** for beneficiary-scheme matching and integrated **Selenium web scraping** with a **RAG-based AI assistant** for scheme eligibility and regional insights.
- Automated regional event discovery using **Selenium** and transformed scraped data into structured datasets for analysis, while integrating **Leaflet** and **Recharts** for interactive geographic and analytical visualizations.

Veyntra

github.com/mithra0612/Veyntra

Tech Stack: Next.js, TypeScript, Supabase, LangGraph, Google Gemini, Groq

- Built a platform that transforms software ideas into structured **development packages**, including coding prompts, PRDs, implementation plans, and component blueprints.
- Engineered a **multi-stage AI workflow** with conversational refinement, synchronized outputs, and version history across successive generations.
- Integrated **Supabase** for persistent application data and built the platform with **Next.js and TypeScript**, connecting multiple LLM services to support the end-to-end generation workflow.

Achievements

- **National Finalist** – Smart India Hackathon 2024 (AICTE).
- **Winner** – Hack'IT 2025, Anna University (CEG), Chennai.
- **Best Business Pitch Award** – Nexathon 2025, KCG College of Technology, Chennai.
- Solved **500+ DSA problems**, participated in **66 coding contests**, and achieved a peak **LeetCode Contest Rating of 1,514**.
- Competed in **10+ national-level hackathons, coding competitions, and innovation challenges**.
