A **sophomore Computer Science student** with a strong foundation in **Data Structures and Algorithms (DSA)**. Hands-on experience in **full-stack development**, with strong **frontend skills** for building **intuitive user interfaces** and an expanding foundation in **backend technologies**. Aiming to harness **AI** and **cloud technologies** to elevate **application intelligence** and drive **impactful digital solutions**.

Education

Bannari Amman Institute of Technology, Erode, Tamil Nadu
Computer Science and Engineering

2023 – 2027
CGPA: 9.08/10

Projects

AI-Powered Financial Services Platform for India Post

- Developed an **AI platform** to forecast seasonal financial needs by analyzing **demographics** and **farming cycles**, enabling targeted service delivery across **India Post's customer network**.
- Built a scalable **web interface** using **Next.js**, integrated with **RAG** and **LightGBM models** on **Google Cloud**, delivering personalized service recommendations.

Growth Guardian – AI-Driven Financial Literacy Platform and Scam Detection

- Developed a comprehensive **AI-driven financial literacy platform** to enhance user knowledge, featuring tools like **investment simulators**, **budget planners**, and **scam detection systems**.
- Integrated **machine learning** models for **asset return forecasting** and personalized financial insights, improving user engagement and decision-making.
- Utilized **React.js** and **Node.js** to build a scalable, interactive interface, ensuring seamless user experience and real-time updates.

AI-Powered Health and Wellness Platform

- Designed an **AI-powered platform** offering **personalized diet recommendations**, **gamified myth-busting experiences**, and an interactive **chatbot** for addressing **health queries**, alongside **period**, **ovulation**, and **pregnancy tracking**.
- Built with **React.js**, **Node.js**, and **Express.js**, using **Firestore** and **Google Cloud** to ensure scalable, real-time **health data management**.

Second-Hand Car Marketplace

- Developed a platform with two user roles—**Buyers** and **Sellers**—allowing buyers to wishlist or purchase cars, and sellers to list vehicles for sale. Incorporated a mandatory **mechanic inspection** process for every transaction, along with **AI-driven price prediction** for fair valuations.
- Implemented a real-time **chatbot** for query resolution, using **React.js** for the frontend, **Node.js** for backend services, and **Machine Learning models** for dynamic pricing and inspection support.

Skills

- Programming Languages:** Java, C, Python, JavaScript
- Frameworks & Libraries:** Next.js, React.js, Node.js, Express.js, NumPy, Pandas
- Databases & Cloud:** MongoDB, MySQL, Google Cloud Platform (GCP)
- Developer Tools:** Git, GitHub, Figma, Postman, Vercel, Render

Achievements

- Smart India Hackathon 2024** – Finalist
- Hack'IT 25** – Winner, National Level Hackathon, Anna University, CEG, Chennai
- Nexathon'25** – Best Business Pitch Award, Nationwide Hackathon, KCG College of Technology, Chennai
